EXPERIENCE

Software Engineer, Consulting

April 2025 — Present

Independent Technical Projects · Remote

- Contractor (LinkedIn):** Working on LinkedIn's Internal Model Evaluation and Training Capabilities to produce accurate and rich datasets.
- Web App (MSN):** Built a Social Meetups website using **Next.js** and **Supabase** setting up Authentication, Database, and developing a Clean User Interface.
- Implemented **multiple AI Agents** across various use-cases using Langchain and Langgraph ensuring persistent memory and observability tracking.
- Mobile App (Hermi):** Built a cross-platform mobile app using **React Native**, delivering a complete full-stack MVP (now available on both Android and iOS!).
- Created multiple **Automations using Make and N8N** to manage WhatsApp Communities, automated email alerts, follow-ups, and data enrichment.
- Chrome Extension (SubSync):** Built and published a Chrome extension using **JavaScript**, implementing popup UI, content scripts, and background service workers.
- Integrated Chrome APIs for media interception and File System URL reading, growing SubSync to **100+ organic users** with minimal churn.
- Enterprise Architecture:** Consulted a small business by creating a comprehensive system design (LLD and HLD) for an ERP desktop software.
- Scalable Web Crawler:** Developed a LinkedIn crawler capable of bypassing captchas, evading browser fingerprinting and proxy detection, and scraping **1,000+ records/day**.
- Technical Writing:** Published **15+ technical articles** across DEV Community, Medium, and Hashnode on web development and system design.

Full Stack Developer

May 2022 — May 2025

JP Morgan Chase & Co · Mumbai, India

- AI-Driven Automation:** Built Python utilities for code refactoring, vulnerability scanning, and coverage testing, **clearing over 90%** of the pending backlog.
- Test Case Generation:** Developed a FastAPI-based AI test generator that reduced developer effort and technical debt by automating test creation.
- Interactive SPAs:** Built **10+** high-performance Single Page Applications using React.js, Ag-grid, and Highcharts that were live on the JPMM Research Platform.
- Institutional Investor Survey:** Conceptualized and launched a "Sales Assignments Tool" for a prestigious financial survey, scaling the product to **1,400+ end users**.
- Leadership & Efficiency:** Led a team of 2 analysts in end-to-end data crawling projects, cumulatively **saving more than 20,000 hours** of manual work over 18 months using Python automation and Tableau.

Software Engineer

May 2021 — May 2022

Authbridge · Remote

- Data Extraction Pipeline:** Built an automated document-processing pipeline that parsed **10,000+ pages daily** into structured data.
- Image Processing:** Applied deskewing, deblurring, and noise removal with OpenCV and NumPy to achieve **95% OCR accuracy**.
- Deep Learning Models:** Established and deployed end-to-end models for captcha detection using TensorFlow and Keras. Designed custom architectures incorporating CNNs, RNNs, and LSTMs.
- API Deployment:** Deployed machine learning model endpoints and APIs for stakeholders using Flask, FastAPI, Conda, and AWS EC2.

EDUCATION

Indian Institute of Technology, Patna

B.Tech in Mechanical Engineering
CGPA: 8.47 / 10 · August 2021

SKILLS

WEB TECHNOLOGIES

TypeScript Next.js React.js
ShadCN Tailwind CSS3
HTML5

STATE MANAGEMENT & TESTING

Redux TanStack Query Vitest
Lighthouse

MESSAGING & CACHE

Redis Temporal RabbitMQ
Kafka

AGENTIC SKILLS

Langchain Langgraph
Langsmith Agents Skills
MCPs Make N8N

VOICE AI & OBSERVABILITY

LiveKit Langfuse ASR TTS

BACKEND & DATABASE

Python Node.js Nest.js
Java (SpringBoot) GoLang
ORMs (Prisma, SQLAlchemy)
Postgres Docker

CLOUD & DEVOPS

AWS GCP Prometheus
Grafana Kubernetes

SOFT SKILLS

Leadership Adaptability
Stakeholder Management
Self-Starter

CERTIFICATIONS

- Neural Networks & Deep Learning
- Intermediate Machine Learning
- Advanced SQL
- Computer Vision
